HAN-T creates original designs that bring together aesthetics and functionality, adding value to both living and working spaces.

At **HAN-T Interior Architecture**, we transform living and working environments by combining aesthetics, comfort, and functionality with distinctive design solutions. In every project, we focus on user needs, developing modern, innovative, and tailor-made designs.

From residential interiors to offices, and from commercial spaces to social environments, HAN-T makes a difference across a wide spectrum with character-defining details and a sustainable design approach, leaving a lasting impression on spaces.

Discover the expertise of HAN-T to turn the space you imagine into reality.

Interior Design

At HAN-T, we combine aesthetics, functionality, and comfort in living and working spaces. We design spaces not only with visual appeal in mind, but also to be highly efficient in terms of ergonomics and structural performance.

In every project, we analyze user needs, the potential of the space, and current design trends to deliver original and sustainable solutions.

Furniture

In our furniture designs, we prioritize both aesthetics and functionality, creating original, user-focused products. Each piece is designed to harmonize with the overall atmosphere of the space and is produced using carefully selected materials.

Our goal is not merely to create furniture, but to present distinctive works of art that add character and value to living spaces.

Execution

During the execution phase, where designs come to life, we approach projects with meticulous attention and a quality-driven mindset. From material selection to the finest details, we maintain high standards at every stage.

With our experienced team, we complete projects on time, within budget, and flawlessly—transforming envisioned spaces into reality.

Discovery

The discovery phase is the first and most critical step of our project journey. At this stage, we conduct a detailed analysis of the space's physical characteristics, as well as user needs and expectations. Through on-site observations, we clarify the project scope and establish a solid foundation for functional and creative design solutions.

3D Visualization

During the 3D modeling stage, we bring our designs to life through three-dimensional visualizations, clearly presenting the final vision of the project before implementation. This allows our clients to experience the space virtually and shape final decisions based on these visuals.

Planning

The planning phase is a critical stage that forms the backbone of the design. Based on data gathered during the discovery phase, we develop a balanced project concept that integrates functionality, aesthetics, and technical requirements. At this stage, we plan the layout and material selections to ensure the most efficient use of the space's potential.

Execution

The execution phase is the final and most concrete stage, where the design is translated into reality on site. From material procurement to installation, we manage every step with precision. Prioritizing quality and workplace safety, we deliver projects on time and flawlessly, as promised.

Design and Execution by HAN-T.

This HAN-T–signed office project offers both aesthetic and functional working environments through the harmony of wood elements and modern lines, creating warm and professional spaces.

Reflecting a modern and sophisticated design approach, this office project combines warmth and functionality to deliver efficient workspaces. The extensive use of wood, neutral color palettes, and carefully designed lighting details create an atmosphere that is both welcoming and professional. From entrance areas to meeting rooms, executive offices, and thoughtfully designed auxiliary spaces and elegant restrooms, every detail has been resolved with a balance of aesthetics and functionality. This approach not only enhances employee comfort and productivity but also establishes a strong, contemporary corporate identity.

Design and Execution by HAN-T.

This residential project bearing the HAN-T signature stands out with its sophisticated details and functional solutions throughout the space, while offering a modern and luxurious living environment.

This comprehensive HAN-T–designed residential project brings together the aesthetic and functional expectations of contemporary living within a refined, luxury-oriented framework. The overall design language achieves a sophisticated balance through the predominant use of neutral tones such as gray, beige, and cream, complemented by metallic accents like gold and brass, black highlights, and warm wood textures. Carefully designed lighting elements—from concealed LED strips to decorative pendant lights and wall sconces—add both functional brightness and a welcoming atmosphere to the interiors.
